AZUR COLLECTION

Moss walls: The process that allows moss and plants to be mummified, to stop their biological activities and thus to preserve their appearance, texture and color, is called a mummified or stabilized plant or algae. Moss wall applications are frequently preferred indoors and in areas that do not receive direct sunlight such as offices, cafes, restaurants, shopping malls, plazas.

Moss walls are vertical garden applications applied with plant varieties fixed on stabilized moss. These applications are preferred with their natural and aesthetic appearance they provide to the environment.

Moss wall and vertical garden applications, which have become indispensable for the interior architecture sector in recent years, clean the air of their environment and create a happy working / living space.

Moss wall applications are among the most popular applications among vertical gardens and have become very popular in the field of interior decoration in recent years.

As BD Vertical Gardens, all of our moss wall applications are also prepared with hypoallergenic techniques with antibacterial properties.

Various studies on moss walls in recent years ;

- It reduces stress in the environment,
- Increases productivity,
- It reduces the risk of airborne diseases,
- Shows that increasing the learning ability.

LUSH COLLECTION
